PRODUCT PROJECTS

Loadvanta | AI-Enabled Freight Document Automation MVP

- Identified manual data entry and verification in freight rate confirmations as a target problem for US freight brokerages.
- Designed an upload-to-validation workflow with separate Auto-Sync and Review Queue outcomes.
- Defined deterministic validation rules for mandatory fields, financial calculations, confidence thresholds, and missing information.
- Developed a prototype for document extraction, validation, and exception handling.
- Defined an ROI framework to measure processing time saved, manual entries avoided, and errors caught.

ChargeDossier | Payment Dispute Evidence Workflow Prototype

- Designed a product concept for improving merchant payment-dispute evidence preparation and case prioritization.
- Modelled scenarios involving fraud claims, delivery evidence, contradictory information, and policy gaps.
- Created evidence-quality scoring and Tier A/B/C prioritization to identify cases requiring additional evidence or review.
- Developed test scenarios to evaluate the workflow and its decision rules.

Uber Commute Lock | Product Strategy Case Study

- Analysed commuter challenges involving surge pricing, cancellations, and recurring office travel.
- Proposed a subscription-based MVP offering predictable pricing for recurring commutes.
- Developed a PRD covering user stories, feature prioritization, success metrics, and proposed operational requirements.
