ABOUT ME

Integrated MBA candidate specializing in International Business, with a business-first approach to product discovery, MVP development, product documentation, workflow design, and AI-assisted prototyping. Experienced in translating business problems into structured product concepts, validation workflows, and measurable success metrics. Portfolio projects span freight document automation, payment dispute evidence management, and subscription-based commuter pricing. Sole author of a published working paper on digital marketing and cross-cultural brand awareness. Seeking opportunities in Associate Product Management, Junior Product Management, Product Analysis, and AI Product Management.

PRODUCT & STRATEGY PROJECTS

1. Loadvanta — AI-Enabled Freight Document Automation MVP
Role: Founder / Product Builder
Repository:

- Product Management: Product discovery, problem framing, PRD writing, user stories, MVP scoping, feature prioritization, product workflows, competitive analysis, product metrics, Agile/Scrum fundamentals.
- Business and Strategy: Market research, customer segmentation, international business, growth strategy, go-to-market thinking, KPI definition, ROI frameworks, stakeholder management.
- Digital and Technical Tools: GitHub, Jira, Linear, Claude, ChatPRD, Kimi AI, v0 by Vercel, Gamma, and AI-assisted prototyping.
- Include tools only if you can confidently explain how you have used them.
- Defined a product concept for US freight brokerages to reduce manual data entry from freight rate confirmations and related documents.
- Designed a workflow covering document upload, data extraction, deterministic validation, and an Auto-Sync or Review Queue decision.
- Specified validation guardrails for mandatory fields, financial calculations, positive values, and confidence thresholds.
- Designed exception handling so missing information and low-confidence results are sent for human review instead of being guessed or automatically approved.
- Developed an ROI measurement framework covering processing time saved, manual entries avoided, and errors caught.

2. ChargeDossier — Payment Dispute Evidence Workflow Prototype
Role: Product Portfolio Project
GitHub:

- Product Management: Product discovery, problem framing, PRD writing, user stories, MVP scoping, feature prioritization, product workflows, competitive analysis, product metrics, Agile/Scrum fundamentals.
- Business and Strategy: Market research, customer segmentation, international business, growth strategy, go-to-market thinking, KPI definition, ROI frameworks, stakeholder management.
- Digital and Technical Tools: GitHub, Jira, Linear, Claude, ChatPRD, Kimi AI, v0 by Vercel, Gamma, and AI-assisted prototyping.
- Include tools only if you can confidently explain how you have used them.
- Explored a product workflow to help merchants organize and assess evidence for payment disputes.
- Designed an evidence-quality scoring approach and Tier A, Tier B, and Tier C prioritization framework.
- Developed sample scenarios covering fraud disputes, missing proof of delivery, conflicting evidence, and policy gaps.
- Focused on helping users identify evidence deficiencies and prioritize cases for further review.
- Project testing was previously reported as 19 out of 19 checks passing.

3. Uber Commute Lock — Product Strategy Case Study
Role: Product Portfolio Project
Portfolio:

- Product Management: Product discovery, problem framing, PRD writing, user stories, MVP scoping, feature prioritization, product workflows, competitive analysis, product metrics, Agile/Scrum fundamentals.
- Business and Strategy: Market research, customer segmentation, international business, growth strategy, go-to-market thinking, KPI definition, ROI frameworks, stakeholder management.
- Digital and Technical Tools: GitHub, Jira, Linear, Claude, ChatPRD, Kimi AI, v0 by Vercel, Gamma, and AI-assisted prototyping.
- Include tools only if you can confidently explain how you have used them.
- Developed a subscription-based MVP concept for recurring commuters seeking more predictable commute pricing.
- Identified user needs and outlined a product requirements document.
- Structured user stories, feature priorities, and potential success metrics to support product evaluation.
